

## MatHolding grows by 6% to reach €429 million in revenue in 2025

- The group maintains its investment pace, with €44 million invested in 2025 and a total of €147 million since 2019
- 70% of revenue comes from international business

Barcelona, 15 April 2026. – The multinational industrial group MatHolding, a leader in solutions and technology for the sustainable and efficient management of agriculture and water, closed the 2025 financial year with a 6% increase in aggregate revenue, reaching €429 million. EBITDA stood at €65 million, up 16% on the previous year.

This represents the best result in the group's 90-year history, since the founding in 1935 of IQV, the company at the origin of the group. "Once again, MatHolding's results reflect our commitment to being a leader in the sectors in which we operate," said the Group's President, Pau Relat.

MatHolding organises its businesses into two main divisions, agriculture and water, accounting for 60% and 40% of total revenue respectively. In 2025, both divisions contributed to growth: the agriculture business grew by 10%, while the water division increased by 4%.

Over the past six years (since 2019), sales have grown at an average annual rate of 9%, while EBITDA has increased at an average annual rate of 17%.

In recent years, the group has maintained a strong pace of investment. In 2025, total investment reached €44 million, bringing the cumulative figure for the 2019–2025 period to €147 million. Notable highlights include the acquisition of Altinco, a biosolutions manufacturer, strengthening the capabilities of Cerestia, the group's agriculture division. Improvements were also made across all of the group's industrial capabilities.

Headquartered in Parets del Vallès, MatHolding has 18 industrial operations centres across 8 countries in Europe, Asia and the Americas, with local presence in 17 countries. The group generates 70% of its business outside Spain, with commercial presence in 140 countries. In 2025, MatHolding's workforce grew by 6%, reaching 1,276 employees worldwide.

"We operate in agriculture and water, two strategic sectors for the future of both people and the planet. The agricultural sector is facing increasing complexity, and Cerestia

represents a strategic opportunity to support the transformation of agriculture from the Iberian Peninsula. Meanwhile, in the water division, we are consolidating the group's global industrial footprint," explained Relat. "Few companies can celebrate 90 years and do so at their best moment. Our future strategy remains focused on sustaining growth through a combination of organic and inorganic expansion."

## About MatHolding

MatHolding is a family-owned multinational industrial group dedicated to developing solutions and technology for the efficient and sustainable management of agriculture and water. The group's businesses are organised into two divisions.

On the one hand, Cerestia, the umbrella brand that brings together the agri businesses: IQV (a global leader in copper salts for agriculture, founded in 1935), and Altinco (a biosolutions manufacturer, acquired in 2025); Regaber (a leader in precision irrigation in the Iberian Peninsula since 1980); TerraNostra (focused on farm transformation and modernisation since 2022); and VEGGA (a platform for the digitalisation of agriculture, a joint venture created in 2022 with Sistemes Electrònics Progrés).

The water division includes Aquestia, focused on fluid conveyance and control; STF, specialising in filtration; and Hidroglobal, dedicated to hydraulic projects. The group has a team of more than 1,200 professionals across 17 countries, operates 18 industrial operations centres, and provides services on five continents in 140 countries.
